PANEL DISCUSSION
HIGH SCHOOL E-TRANSCRIPTS

Objective of Panel Discussion

- The session is designed as a panel discussion on the benefits of automating electronic high school transcripts as well as the challenges of processing them.

- With the growing demand of receiving high school transcripts by EDI or XML, we hope to learn from the panel and the audience <u>if</u> and <u>how</u> they are receiving and processing electronic high school transcripts.

- The session will discuss the how electronic high school data is being used for planning, admission and enrollment.

- It will also focus on the business process and cost saving benefits of moving towards electronic high school transcript data.

- The session will also include several vendors that are working with high schools to delivery electronic high school transcript data.

Discussion Topics

- Is your College/University receiving electronic high school transcripts?
- What percentage of your high school transcripts are being delivered in EDI or XML?
- Loading the data in your SIS and/or Imaging system
- Processing Time: Paper, PDF and eTranscripts (EDI or XML)
- Changes to the business processes with eTransripts
- Cost savings of using eTranscripts
- Identifying types of high school transcripts by the data (6th semester, 7th semester and Final)

Discussion Topics

- How <u>is</u> the data being used?
  - Admissions Decisions
  - Receipting Transcripts
  - Course Completion
- How <u>can</u> the data be used?
  - Planning
  - Advising
  - Failing Grades
  - Conditional Status (EAP, SAT or ACT)
  - Course Placement
- Challenges getting more high schools to delivery eTranscripts
- CSU campuses that received "TRAN" data through CSUMentor, did it change your process in anyway?
- Third-Party Solutions and Offerings
