What's Next for eTranscript California

Presented by:
Mark Cohen, eTranscript California Product Manager
California Community Colleges Technology Center

Session Goals

- Current Status
- The 2.0 Mission
- Fulfilling the Mission
- Why We Focus on Data
- How We Get to 2.0
- Q & A

eTRANSCRIPT CALIFORNIA

Current Status

1,000,000 transcripts delivered!

Volume doesn't tell the whole story…

Partial Adoption

- 55% CCC's sending eTranscripts
- 22% CCC's accepting receiver initiated requests
- Adoption split by thirds, full, partial, weak adoption
- Not all transcripts include required data elements

Incomplete Solution

- No current support for inbound HS transcripts
- Student ordering not directly supported
- No clear support for vendor integration

Mixed Feedback

- Senders generally satisfied, receivers less so
- Most CCC's would like an ordering portal
- Non-adoptees report IT resources, incomplete functionality, and cost as barriers to adoption

eTranscriptCA 2.0 Mission

The ubiquitous exchange of transcripts in the California electronic transcript data standard to, from, and between California Community Colleges campuses and districts.

eTRANSCRIPT CALIFORNIA

The Levers Of Adoption

Go Live

Bring CCC's online as senders with new integration options and robust functionality offering an end-to-end solution.

Fully Adopt

Grow adoption by starting with the student request, while integrating with colleges eTranscript service provider.

Quality Data

Integrate missing data elements stored outside of the SIS (CSUGE & IGETC Cert), while improving data validation

Set Goals / Measure Success

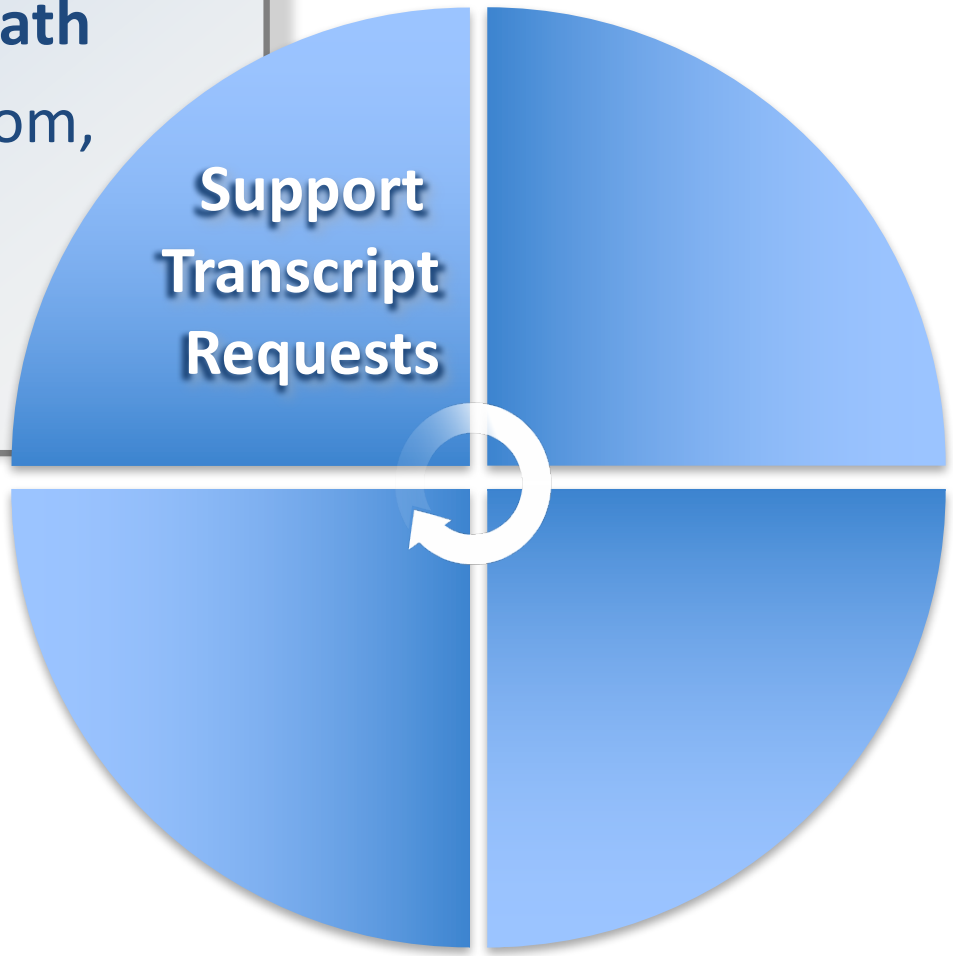
Data Supports Student Success!

- Place students through **Multiple Measures**
- Populate **Ed plans** used to advise students
- Return grades through **Course Exchange**
- Support **Transfer**, **Articulation**, and **Pathways**
- Provide employers with data supporting **Strong Workforce**

eTRANSCRIPT CALIFORNIA

How We Get To 2.0

Support transcript requests in **MyPath Portal** to, and from, CCC's



eTRANSCRIPT CALIFORNIA

How We Get To 2.0

Support transcript requests in MyPath Portal to, and from, CCC's

Student Requests in MyPath Portal

Transcripts Delivered To CCC's

- Request transcript following application
- Data leveraged in placement

Transcripts Sent From CCC's

- Transfer between colleges
- Transcripts sent to employers and others

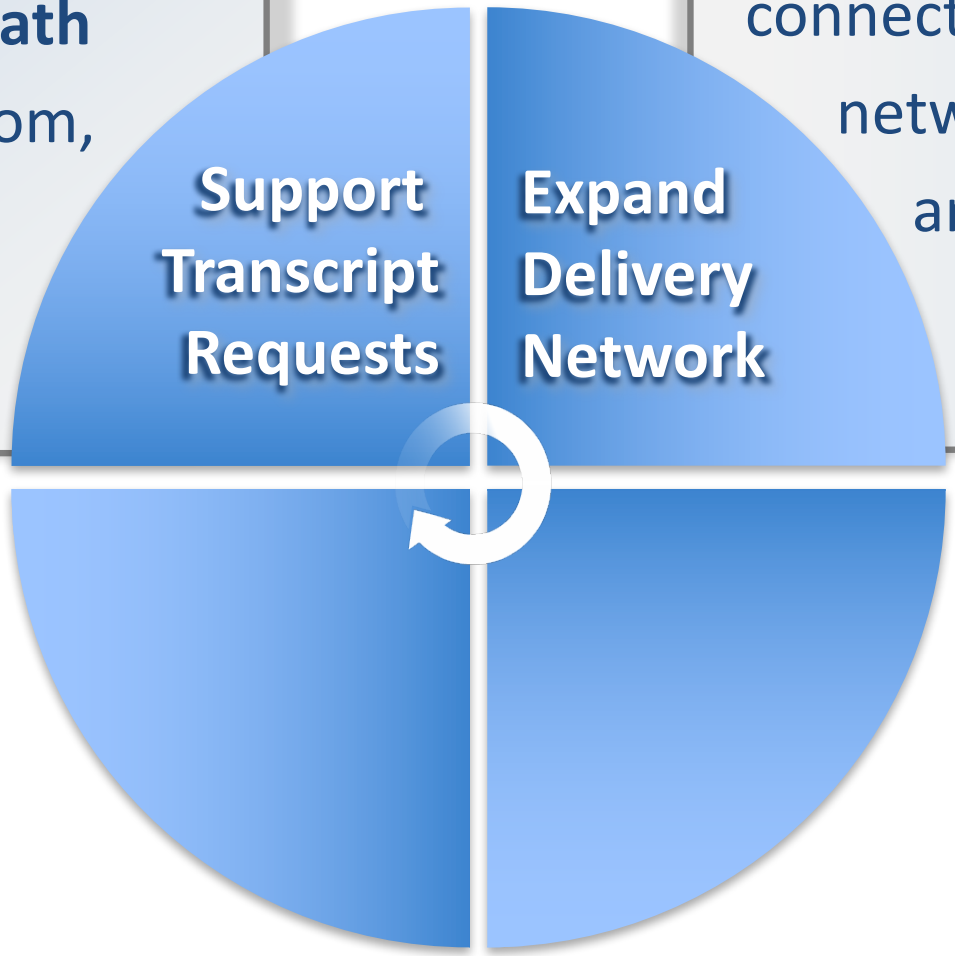
Integration With CCC Applications

- eTranscript service providers
- Student information systems

eTRANSCRIPT CALIFORNIA

How We Get To 2.0

Support transcript requests in **MyPath Portal** to, and from, CCC's



Leverage **EdExchange** to connect transcript networks that offer an expanded delivery network

eTRANSCRIPT CALIFORNIA

How We Get To 2.0

Support transcript requests in MyPath to, and from, CCC's **Portal**

Leverage **EdExchange** to connect transcript networks that offer delivery network

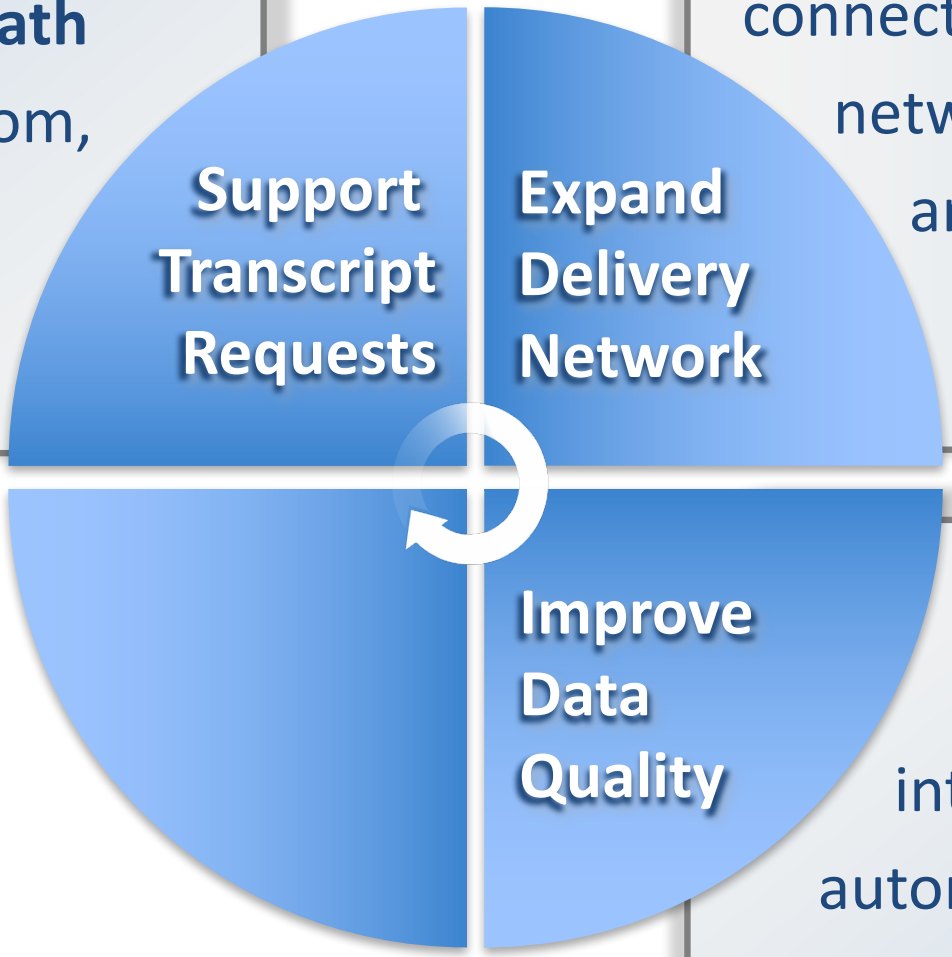
Expanded Delivery through EdExchange

- Secure, peer-to-peer exchange, managed by PESC
- Governed by steering committee that includes CCC Tech Center, Credentials, National Student Clearinghouse, & Parchment
- May be leveraged to Connect eTranscriptCA with 1000's of destinations
- Supports integration between eTranscriptCA and service providers

eTRANSCRIPT CALIFORNIA

How We Get To 2.0

Support transcript requests in **MyPath Portal** to, and from, CCC's



Leverage **EdExchange** to connect transcript networks that offer an expanded delivery network

Leverage **GLUE** to simplify integration, enable automation, and improve data quality

How We Get To 2.0

Improved Data Quality with Project GLUE

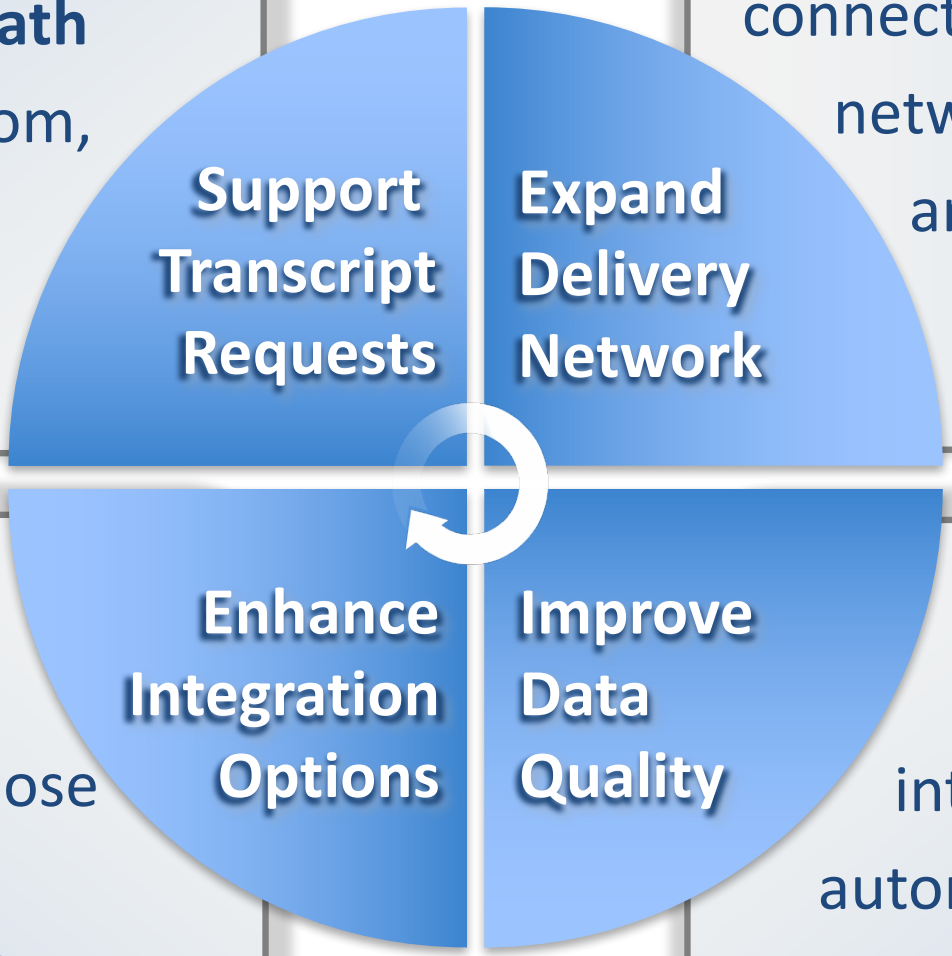
- Tech Center initiative providing integration between CCC's and statewide initiatives
- Integrates with SIS and the systems that store required data elements
- Will be leveraged by eTranscriptCA to:
  - Move requests from ordering portal and SIS
  - Returns transcript data from SIS to eTranscriptCA

eTRANSCRIPT CALIFORNIA

How We Get To 2.0

Support transcript requests in **MyPath Portal** to, and from, CCC's

Leverage **EdExchange** to connect transcript networks that offer an expanded delivery network



Bring HS transcripts into CCC's, provide close **integration** with eTranscript vendors

Leverage **GLUE** to simplify integration, enable automation, and improve data quality

How We Get To 2.0

Develop Enhanced Integration

Integration with High School Transcript Sources

Discussions with leading HS SIS's, eTranscript providers, & statewide systems

Integration with eTranscript service providers

Leverage GLUE and EdExchange to integrate with eTranscript providers
